Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach nor does any combination thereof fairly suggest a foldable skeleton comprising an upper frame with joints mounted between two adjacent first and second rods including a main base with a second side plate formed with a cruciform slot, a locking block movably mounted in the cruciform slot and has a first portion formed with a mounting section secured on a press button to move therewith and a second portion formed with an action section that is movable into a receiving recess of a cover, linking blocks having a first end mounted in a first end of each of the first and second rods pivot therewith and a second end detachably rested on the action section of the locking block, and a bottom frame including an operation member with a rectangular press block rotatably mounted in a receiving slot of a pull member and rested on a cutout of two linking gears.

The combination of elements as set forth in the claims is not shown by the prior art, and in particular the features as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
